

# Carbon Fiber Prepreg

Carbon fiber prepreg is an intermediate material in the form of a sheet of carbon fiber impregnated with matrix resin. There are various types of prepreg such as UD prepreg (unidirectional prepreg), in which carbon fibers are aligned in one direction, and cloth prepreg, in which carbon fibers are woven into a fabric and impregnated with matrix resin.

## **PYROFIL™** UD Prepreg (Unidirectional Prepreg)

Product name	Carbon fiber type	Resin type	Carbon fiber weight (Fiber areal weight) (g/m <sup>2</sup> )	Resin content (RC) (wt%)	Prepreg weight (Prepreg areal weight) (g/m <sup>2</sup> )	Thickness (mm)	Std. length (m)

# Carbon Fiber Prepreg

## PYROFIL™ Prepreg Matrix Resin List

Resin number	Resin type	Curing temperature (°C)	Main applications	Features
#350	Epoxy	130	General applications, sporting goods	High toughness
#381	Epoxy	130	Cloth prepreg, general purpose	Transparent appearance
#392	Epoxy	130	General applications, sporting goods	Rapid curing
#395	Epoxy	130	General applications, sporting goods	Rapid curing, high toughness
#361	Epoxy	130 - 140	Industrial, automotive exterior components	Press molding (PCM), rapid curing, class A appearance
#368	Epoxy	130 - 140	Industrial, automotive exterior components	Press molding (PCM), rapid curing, heat resistance
#3R1	Epoxy	130 - 150	Industrial, automobiles	Press molding (PCM), ultra-rapid curing, heat resistance
#830	Epoxy	80	General applications, sporting goods	Low-temperature curing
#853	Epoxy	80 (demolding) 180 (post-curing)	Industrial, aerospace tools (mold materials)	Low-temperature curing, demoldable
#261	Epoxy	180	General applications, general industrial	Heat resistance (post-curing), low thermal expansion
#270	Epoxy	180	Industrial, aerospace tools (mold materials)	Heat resistance, low thermal expansion
#266	Epoxy	180	General industrial	Heat resistance, toughness
#290	Cyanate ester	135 (demolding) 250 (post-curing)	Industrial, aerospace	High heat resistance
#108	Epoxy	180	Aerospace	Heat resistance, toughness
