

MOS Indices

As part of its efforts to promote KAITEKI Management, Mitsubishi Chemical Holdings (MCHC) has created the MOS (Management of Sustainability) Indices to gauge its contribution to people, society and the Earth. MCHC uses these indices to evaluate progress made with regard to MOS, one of its management axes, which aims to enhance social value through improvements in sustainability. The MCHC Group has revised the MOS Indices and the ways it is using them in line with updates to its materiality assessments and the formulation of the medium-term management plan. The Group has been applying the new MOS Indices since fiscal 2016.

As an operating company, Mitsubishi Chemical also implements and evaluates management aimed at improving sustainability based on the new MOS Indices.

Index that needs to be achieved		Achieve zero occurrences of serious accidents and compliance violations
S Index	Contribute to reducing environmental impact (S-1)	Reduce burden on the atmospheric environment
		Reduce burden on the water environment
