

FUNCSTER™, long glass fiber reinforced polypropylene for automotive parts : semi-structure parts and other parts

Characteristics and Advantages

- To reduce parts weight by 10 - 30% from engineering plastics
- High mechanical properties of modulus and impact strength
- To enable more free design by material robustness
- Excellent appearance for interior parts
- Global Suppliability (Japan, U.S., China)

Proposal for the future

- Weight reduction for better mileage
- 15% weight reduction → 7-10% better mileage

Japan Polypropylene Corporation
