Mitsubishi Chemical Corporation Announces
Expansion of Semiconductor Precision Cleaning Operations

Mitsubishi Chemical Corporation

Mitsubishi Chemical Corporation (MCC; Head office: Chiyoda-ku, Tokyo; President: Masayuki Waga) will invest over 10 million Euro for an expansion of its precision cleaning facility in Dresden, Germany. This expansion of subsidiary Cleanpart Dresden GmbH (Cleanpart Dresden; Location: Dresden, Germany; President: Ryuhei Sato) will support the rapidly growing production of semiconductor wafers by its customers in the Saxony region and surrounding areas.

The expansion, with completion scheduled for late 2022, will include construction of a new building on the existing Cleanpart Dresden site to house an expanded cleanroom. The space will be equipped with modern semi-automated chemical clean lines, chemical free pre-cleaning equipment for process waste reduction, and other innovative new tools for precision cleaning semiconductor equipment chamber parts.

Ryuhei Sato, Chief Operating Officer of Mitsubishi Chemical Europe GmbH said, “The Saxony region of Germany is experiencing tremendous growth in semiconductor wafer production volumes. As a long-time partner to our customers in the region, we are excited to expand our capacity while introducing a number of new ‘green’ processes in keeping with MCC’s vision of KAITEKI”.

MCC, through its Shinryo and Cleanpart subsidiaries, is a global leader in the cleaning and reconditioning of critical semiconductor equipment components. By achieving very high levels of cleanliness, and with tight control of surface finishes, this service returns used parts to like-new condition, supporting our customer’s continuous drive towards higher efficiency and production yields.

MCC offers a total turnkey solution that includes ingoing and outgoing logistics, warehousing, disassembly, precision cleaning, precious metal recovery, coating, and reassembly of semiconductor equipment parts. Accordingly, MCC has established itself as the largest precision cleaning solution provider in Europe.
